Unit 20

natural   artificial   climate   recycle
conservation positive   negative
erosion   litter   pollution

1) Handwrite each spelling word in your exercise book twice.

2) Give the science glossary or dictionary definition. The definition must be related to habitats or the environment. Be sure that you understand what you are writing.

Example:

1) *positive*   *negative*

positive   *negative*

2) positive: being helpful or improving the current situation

negative: being harmful or not helpful
