

## Unit 21

geometry polygon triangle rectangle square prism  
pentagon hexagon octagon decagon sphere  
symmetry pyramid quadrilateral vertex

- 1) Handwrite each spelling word in your exercise book twice.
- 2) Create a 4 way chart like below. Write the word, break it into syllables, give the “Math Makes Sense” glossary or dictionary definition and draw a picture. Be sure that you understand what you are writing. The picture should help you understand the meaning of the word.

Example:

- 1) decagon  
decagon

- 2) 

<b>Word</b>	<b>Syllables</b>	<b>Definition</b>	<b>Picture</b>
decagon	dec-a-gon	a 10 sided polygon
